In the future, the world is divided into four countries: A world in which no war happened A world in which there is war and massacres A world of North Korea A world of South Korea A picture of my favorite future - A future I had gone to a wedding ceremony But the atmosphere was a bit foggy, so... I went back to my house. At that time, the doorbell rang My house was being occupied by the police. "Take out your IDs!" "You come here, too, daughter!" I took out my ID While being questioned by the policemen, a very strong gust of wind blew by "The wind is going to rain, turn up the gas stove!" "Okay!" All the policemen stepped back And I went down to the basement. "Where are you going?" "Just a second." "What have you got on your head?" "Just a second, it's my headband." "Let me fix it for you, Kim Shinhye!" "Thank you!" I put the gas stove in my hair, And cut a hole in my headband. "No matter what happens, I won't lose my headband!" I turned up the gas stove. "Please forgive me, mom! To my future mother-in-law, who saved me, to my future mother-in-law, who saved me!" I could not say this Because I could not forget about my mother At the same time, I could not forget about my sister. I had wondered about my future, What would I do if my sister is sentenced to death? "I'm going to die! I'm going to die!" I looked at my life expectancy chart. The shadow of death from 18 years to 20 years - I lost focus I don't even know if it's a dream or not. I am going to die at that time. I thought to myself: "This is only the first day, and the second and the third day and..." "Wait, Kim Shinhye, the third day and..." I turned up the gas stove. "Turn off the light, Shinhye Turn off the light, Shinhye Turn off the light, Shinhye So you will be able to sleep." I

----- "My So-called Future Girlfriend" can be enjoyed in many ways. As a game that is enjoyable even just reading, we'd like players to play it with their imaginations. The date dialogue flows in a natural manner with the users imagination, and we hope that players can enjoy it as they read it. We also hope to bring out the taste of teenage love as we continue to work. "My So-called Future Girlfriend" can be played online at many websites. We'd also like for you to try playing it offline if you'd like to experience the game with your eyes only. ----- This game is made under the concept of "Yuri (Love) and Visual Novel". We hope to earn players' understanding and congratulations. ----- If there is anything, please leave us a message in our comment section. Thank you. an unusual game set in a hospital, there are a doctor, a nurses, and some patients 1) Udon (Playable) Story (Click to view) There is a town outside a castle which contains a hospital, and you play the male lead doctor that lives in the town. The hospital is filled with patients, there is a teacher, a nurse, and some kids, and you will do everything you can to raise them to a healthy place. The main difference between this and other visual novels is that when you chose a specific path, the progression will be different from the other patients, and it will also give you an ability to die and live again. Some events are only for certain patients, and you should choose accordingly. For example: If you kill a patient that can't be saved, then they will not come out of the room the next time. ----- This game can be played in "English" in 3 different languages of English, French, and German. ----- 2) Others (Playable) Story (Click to view) There is a town outside a castle which contains a hospital, and you play the male lead doctor that lives in the town. ## What's new:

**Hi, there; Im Lauren. I've been on [myspace.com/fatoutofcontrol](http://myspace.com/fatoutofcontrol) a lot lately....Cause I need to be here in case u decide to dive into my future situation with R, whom Ive personally known for 3 years...Now that I'm writing this, I'm beginning to get angry that I haven't blogged about it for so long, cause I've been avoiding it in general...Also, I know why he broke things off between us-the same reason I've been spreading-i love him, but I care.moreless "....Im free / f\*ck your love for paper damn you through his eyes you've never been / no way I'll play it this way that you're / own reflection..." Immediately when I heard Megan Fenner was the one that was in an all nighter with R, I wrote a response to her and I think it would really be great if someone else would respond to her...First, I have known about the R-P thing for about a year before R broke it off with me, but never thought about it until I saw that this girl is the s1 that was in an all nighter with him, cause she's so attractive, of course it took my mind to a different direction. In this situation, I know that she loves him, and she'll do anything to make him happy. I may actually have a chance with him, but does it really matter? Im not going to be with him no matter what, and im tired of waiting for him. I mean, you know how women are-if they are in love with someone, they keep them better than anyone else they could ever have. I think she loves him enough to do anything for him-better than what he has done to me before. Anyways, I just want to get the story out there so if she comes after**

**me, I'll see she's really trying to get back at me...Like I said, im tired of waiting...moreless "But no one cares, and it's a joke..." I only found out about R and T today, and I think I have to write a few things about it so I can get some more responses...First, can someone tell me what the hell they are talking about in the s1 of that song? Im getting really tired of hearing about R and T...Doesnt anyone care about this bull? R is one of my good friends, but damn**

The present invention relates to a multi-layer piezoelectric/electrostrictive device obtained by multilayering a plurality of piezoelectric/electrostrictive elements each containing a piezoelectric/electrostrictive ceramic element to a plurality of electrode pairs which intersect each other at an electrical angle, and drive methods for such a multi-layer piezoelectric/electrostrictive device and methods for driving it. To achieve smaller-sized, lighter-weight and higher-capacity micro-motors or actuators, studies have been made on a multi-layer ceramic component obtained by stacking ceramic layers one on top of another and a multi-layer piezoelectric/electrostrictive device obtained by integrating such a multi-layer ceramic component in one body, and this has led to its practical application in many areas of engineering (see, for example, the following Patent Documents 1 to 3).
