In this story the father of the girl is thinking about visiting his brother in a foreign country. Pushing away such visions his daughter pleads him to allow her to go to a party where she can get acquainted with boys her own age. Our heroes put up a great fight for the girl to the point that a humiliated father only has to be happy about a great party and to give the permission. He advises them to take good care of his daughter and not to let her interfere in any way with the local boys. The girl is pleased about the idea and asks her father to give her a good night kiss before she begins her party. Only after that her boyfriend embraces her tightly and they kiss again. If I use UINavigationController as the only view controller, is it recommended to use just the DetailViewController, or should I set a place in the navigation bar to switch between the two? I get confused when it comes to how to implement this, and there are a lot of conflicting information. A: A UINavigationController is NOT a recommended method. For your app, a UINavigationController only serves as a view controller and the data source for the UITableView. It may be nice if you leave out the Navigation Bar on the "root" ViewController (that can be a UINavigationController or another UIViewController), if your "root" ViewController has its own navigation bar and a method to go back to that "root" ViewController, you don't really need the UINavigationController as the "root" ViewController. You just have to add the UINavigationController as a child ViewController in the navigation stack. There are many, many tutorials out there on how to use UINavigationController, but I think that the UIViewController Class Reference and View Controllers' Guide at Apple
